Internetstiftelsens Federationer

Wiki language

The primary language used in this wiki is English, aiming to provide clear and comprehensible technical documentation for non-Swedish readers and to minimize translation errors in technical terms. However, certain pages may be authored in Swedish when the target audience is specifically from Sweden.

Introduction

Welcome to the technical wiki for the federation services provided by Internetstiftelsen (The Swedish Internet Foundation). This wiki provides current information regarding federation environments, metadata, how-to guides, upcoming changes and other technical activities regarding the federations.
